

Franklin Park dental Offices Chicago

NOVEMBER 2009

SUPERTHERM® applied to roof.

On the Franklin Park Dental job we used **RUSTGRIP**® on all the exposed ductwork. We used **SUPERBASE (HS)**® to prime the roof, **SUPERTHERM**® and then the **SP LIQUID MEMBRANE**®. The roof no longer leaks and the owners have reduced their heating costs for the winter and are looking forward to greater savings this coming summer
