

CONTAINER WORKSHOP

AUSTRALIA - MARCH 2006

SUPERTHERM® and **SP LIQUID MEMBRANE**®

This container has been converted into a workshop for use as an onsite workplace. Two coats of **SUPERTHERM**® and One coat of **SP LIQUID MEMBRANE**® were applied to the exterior. Even with 40°C (104°F) heat outside and no air conditioner going, Halliburton Management were totally impressed with the inside temperature.

The container is fitted with air conditioner, large bench, vice, air compressor and lighting
