

HPC® COATING TEST

December 23 2011

Some pictures of testing for a client.

Before HPC® COATING the temperature of the pipes was **290°C**.

The coating was applied at a thickness of 7mm (276mils) - 10 mm (394 mils) DFT

The temperature was reduced to between **56.4°C** and **45.7°C**.
