

## ANTI-CORROSION SYSTEM APPLIED ON UNDERWATER PIPES.

2004

### Nigeria Offshore Applications

The attached pictures show one of two applications performed in Nigeria.

The job is about pipes used for offshore oil drilling operations, subject to cycles of immersion underwater and storage on deck. Very tough environment and very tough life cycle (salt water, salt spray, sun, impacts, abrasion, and temperatures ranging from 40 to 250 F). The original coating system, applied four years ago, had badly deteriorated.

The application main steps were:

- Sand blasting to SSPC-SP6
- Surface cleaning and chloride removal
- Two coats of **RUST GRIP** ®
- Two coats of **MOIST METAL GRIP** ®
- Two coats of **ENAMO GRIP** ® white

### Before work starts

**Prep work clean dry sound surface ready to accept a coating system**

## Applying the **RUST GRIP** ® Primer

Applying the Base coat of **MOIST METAL GRIP ®**

SPECIALIZED COATINGS AND PROTECTED ENVIRONMENTS

## Applied top coat of **ENAMO GRIP** ®
